Juanita Bay Pump Station Replacement Project

June 2005

Construction of new pump station to begin in summer 2005

King County protects public health and the environment by conveying and treating the region's wastewater. The county's Juanita Bay Pump Station, at 9290 Juanita Drive N.E., must be replaced to increase capacity and ensure safe and reliable operations.

The new pump station will be located across the street from the existing pump station (see map). It will be an attractive, landscaped building designed to fit with the neighborhood.

What work is being conducted?

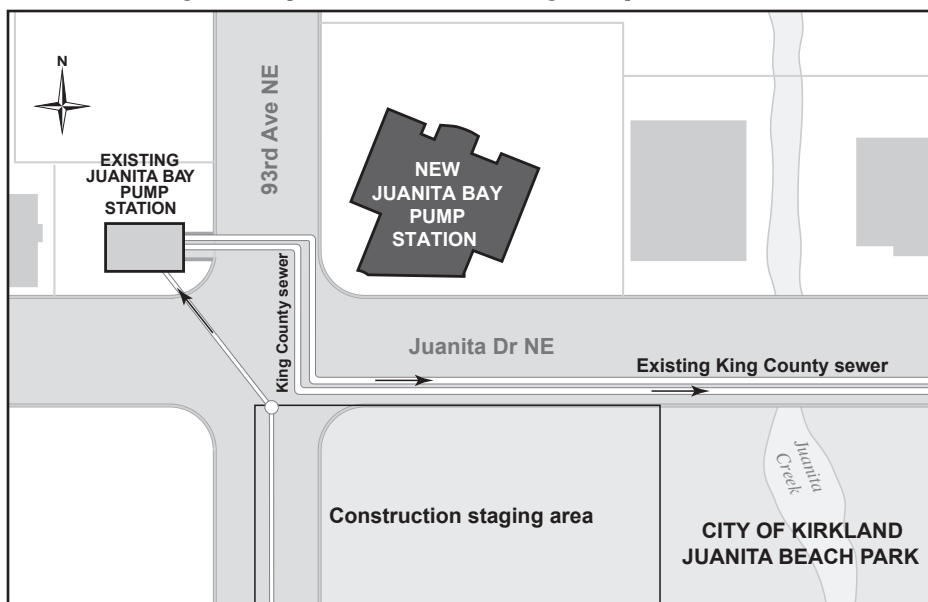

- Construction will begin in summer 2005 and last about two and a half years.
- In mid-June, a contractor for Puget Sound Energy will install construction transformers at the new site and near Juanita Beach Park, where construction equipment will be staged.

- King County's contractor will then begin building the new pump station, which includes several underground floors.
- A new sewer will be tunneled from the construction staging area in Juanita Beach Park, underneath Juanita Drive Northeast, to connect to the new pump station.

What will be done to minimize impacts?

- The pump station site and construction staging area will be fenced.
- Sound walls will be built on two sides of the pump station site, near adjacent apartments and condos.
- Access to residences and Juanita Beach Park will be provided at all times.
- Traffic will be directed and controlled according to city requirements.
- Work will be done safely and as quickly as possible.

***Construction
work will run from
summer 2005
to 2008.***

What can you expect during construction?

King County will:

- Hold a preconstruction community meeting with neighbors to describe the project in detail and to identify and address special needs or concerns.
- Provide advance notice of work being planned.
- Brief community and neighborhood groups on request.
- Operate a 24-hour construction information line to respond promptly to questions and address any problems that may arise.

More information?

- Call **Jennifer Kauffman**, King County Wastewater Treatment Division, at 206-263-6029 or jennifer.kauffman@metrokc.gov.
- Ask to be added to the project mailing list or e-mail lists
- Visit the project Web site at <http://dnr.metrokc.gov/wtd/projects/juanita>
